

Cricket Communications

During our recent CALEA Update and Assessment Survey presentations, one of the carriers commented on by law enforcement officers most often was Cricket Communications. For those agencies wishing to conduct electronic surveillance on a "Cricket Communications" telephone, CIS has provided the following information:

Court orders should be addressed to LEAP Wireless International, D.B.A. Cricket Communications.

The order, once issued by a court of competent jurisdiction, can be faxed to Kay Janney, Compliance Manager for LEAP Wireless provided that it is followed up with an original order being delivered to their office.

Contact information:

Kay Janney
Compliance Manager
10307 Pacific Center Court
San Diego, CA 32121
Voice 858-882-9097
Fax 858-882-9237

Call data information is delivered from their facility located in Albuquerque, NM. It is the responsibility of the law enforcement agency to make this connection. As with other carriers, the law enforcement agency must provide a router and modem to be installed in their facility to complete the CDC or establish a VPN. Call content is delivered via a dial-out "Conference Bridge," dialing to a directory number provided by the law enforcement agency at their listening post.

Costs: \$2200.00 per Order.
